Portuguese (Native), English (Fluent), French (Professional)

SUMMARY

Senior Software Engineer with 13 years of experience building backend systems and cloud infrastructure with Python and AWS. I've led engineering teams and owned architecture end to end, designing multi-tenant SaaS platforms, serverless architectures, payment flows, and privacy and compliance systems (GDPR/LGPD). I'm currently leading the migration of a core guest-facing product used by more than 10,000 hotels to a modular architecture across the US, EU, and APAC regions. Recent work includes LLM-powered features on AWS Bedrock and AI-assisted developer tooling.

EXPERIENCE

Canary Technologies · Senior Software Engineer

Sep 2025 – Present · Remote

- Leading the architecture of the migration of all customer accounts across three regions (US, EU, APAC).
- Designed and built payment flows for card authorization and deposits.
- Improved privacy and compliance by automating the removal of personal data and PII.
- Resolved a production database performance issue, reducing P95 latency from 1800s to under 1ms.

Python · Django · PostgreSQL · Vue.js · TypeScript · AWS · GitHub Actions

BidHound · Principal Software Engineer

Jan 2025 – Sep 2025 · Remote

- Architected a multi-tenant SaaS auction platform with PostgreSQL schema-per-tenant isolation and automated tenant provisioning on AWS Lambda.
- Shipped AI item categorization on AWS Bedrock and a comparable-sales search engine (PostgreSQL full-text search, pgvector, LLM query rewrite) that cut the zero-result rate to 2.7%.
- Designed the full AWS infrastructure in CDK across 8 stacks (Aurora Serverless v2, ECS Fargate on Spot with ~70% cost reduction, Cognito).
- Led a GDPR/LGPD privacy engineering audit: data classification, records of processing, DPIA gap assessment, and a right-to-erasure workflow.

Python · FastAPI · ReactJS · TypeScript · AWS CDK · ECS Fargate · Aurora Serverless · Lambda · S3 · SQS · Cognito · Amazon Bedrock · pgvector · PostgreSQL FTS · GitHub Actions

Modus Create

Jul 2017 – Jan 2025 · Remote

Software consultancy delivering projects for multiple clients. Promoted 3 times: Fullstack Engineer → Senior Fullstack Engineer → Tech Lead → Principal Software Engineer

Principal Software Engineer

Nov 2023 – Jan 2025

- Architected GenAI document-processing solutions on AWS Bedrock, using Tesseract OCR to extract data from unstructured documents.
- Built serverless data pipelines (Lambda, API Gateway, S3, DynamoDB) with infrastructure as code (CloudFormation, CDK) and GitHub Actions CI/CD.

Python · AWS (Serverless, Lambda, CloudFormation, API Gateway, DynamoDB, S3, SNS, SQS) · React · Typescript · Docker · GitHub Actions · PostgreSQL · Django · FastAPI

Client project · C#, .NET Framework, ASP.NET Core, Azure Nov 2023 – Jun 2024

- Architected and optimized C#/.NET backend services on Azure, leading code reviews and engineering best practices.

Tech Lead

Jan 2022 – Nov 2023

- Led a team of 5 developers, delivering on time with Agile practices and technical reviews.
- Architected and deployed serverless systems with AWS SAM, CloudFormation, and ECS, improving client time-to-market and reducing costs.

Python · AWS · Serverless (SAM) · CloudFormation · DocumentDB · ECS · GitHub Actions

Senior Fullstack Engineer

Jan 2020 – Jan 2022

- Optimized legacy systems and built REST APIs with Python/Django, improving performance and reducing maintenance costs.

Python · Django · React · FastAPI · Celery · Jenkins · PostgreSQL

Fullstack Engineer Jul 2017 – Dec 2019

- Built features for two of the world's largest banks and migrated legacy systems to modern architectures with PHP/Laravel, Vue, and React.

PHP · Laravel · Javascript · Angular · VueJS · Docker · PostgreSQL · Jenkins

Stone Pagamentos · **Fullstack Engineer** Nov 2016 – Jul 2017 · Rio de Janeiro

- Built Go REST APIs for the merchant services platform, shipping features used by over 100,000 clients monthly.

Go · NodeJS · AngularJS · PostgreSQL · Docker · Redis · Microservices

Anchor Loans LP · **Backend Engineer** Aug 2015 – Nov 2016 · Remote

- Built the core product and a real-estate crawler with Python (Django, Pyramid) and MongoDB to help investors spot opportunities.

Python · Django · Pyramid · MongoDB · AWS EC2

Perspectiva.in · **Full Stack Engineer** Jan 2015 – Nov 2015 · Remote

- Built a SaaS that automates social interaction between businesses and clients, including Instagram API integration.

PHP · Yii2 · PostgreSQL · MongoDB · Javascript

Fidelize · **Full Stack Engineer** Jun 2013 – Aug 2015 · Rio de Janeiro

- Built order-processing crawlers, a SugarCRM integration, and EDI software with PHP/Yii.

PHP · Yii · PostgreSQL · Javascript · Ionic

SKILLS

Languages: Python, C#, PHP, JavaScript, Go
Frameworks: Django, Flask, FastAPI, ASP.NET Core, Laravel, React, Vue.js
Cloud: AWS Lambda, AWS SAM, AWS CloudFormation, Azure
Databases: PostgreSQL, MongoDB, DynamoDB
Tools: Docker, GitHub Actions, Jenkins

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Computer Science, UERJ (2011 – 2015)
AWS Certified Developer – Associate · AWS Certified Cloud Practitioner · TCF Canada: CEFR C1 listening, C2 reading, B2 speaking, B2 writing
